## **ORGANIZATIONAL BEHAVIOR**

### **TEST INFORMATION**

This test was developed to enable schools to award credit to students for knowledge equivalent to that, which is learned, by students taking the course. The school may choose to award college credit to the student based on the achievement of a passing score. The passing score for each examination is determined by the school based on recommendations from the American Council on Education (ACE). This minimum credit-awarding score is equal to the mean score of students in the norming sample who received a grade of C in the course. Some schools set their own standards for awarding credit and may require a higher score than the ACE recommendation. Students should obtain this information from the institution where they expect to receive credit.
